

Dim Sum Diffs

+ signal - noise

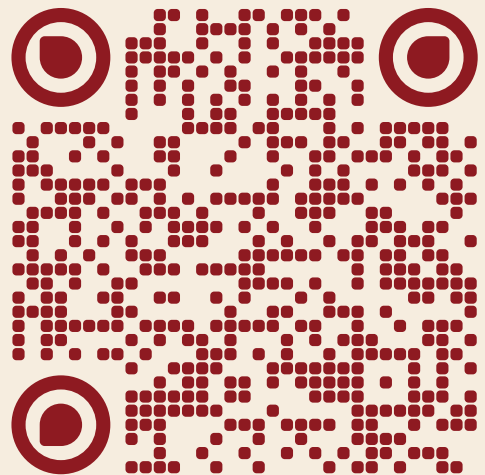

Why

We are drowning in noise: WhatsApp groups that never go quiet, influencer nonsense on every feed. Meanwhile the technology news that actually matters, close to home and around the world, slips right past us.

Time to take our feed back.

How it works

- + **News in the main chat**
Members share technology and startup news. Nothing else.
- + **Discussion in threads**
Every post has its own thread, one tap away.
- + **Pre-moderated**
Each post is checked against the rules first.
- **Noise**
